PROFILE

- Computational scientist (PhD) with hands-on experience in research data management, reproducible pipeline engineering, and interactive data discovery tools for scientific research.
- Core skills: R (tidyverse, Shiny, tidymodels, Bioconductor), Python (JAX, Pandas), SQL, Git, Nextflow, Linux/HPC.
- Built a deployed R Shiny web application (6 modules) for interactive data exploration and created a config-driven data architecture (257 rules → 8 CSVs) at HealthTwist GmbH — experience directly relevant to search and inventory services.
- **Immediately available**; open to relocation.
- Seeking: Research Data Management, Software Development, Bioinformatics, Data Infrastructure.

PROFESSIONAL EXPERIENCE

Clinical Data Engineering — Internship HealthTwist GmbH

📅 02/2026 - 04/2026 📍 Berlin, Germany

Clinical data research and development under Dr. Andreas Busjahn

- Refactored a monolithic 1,834-line R data pipeline (tidyverse) for Germany's interventional radiology quality registry (DeGIR); 143,000+ patient records from ~300 clinics. Reduced to 1,349 lines (–26.5%) with byte-identical output verified via `identical()`.
- Externalised 257 hard-coded correction rules into 8 configuration CSV files, creating a searchable metadata architecture enabling non-programmer editing of business rules.
- Replaced 360 deprecated function calls across 4 pipeline files, modernising the codebase to current tidyverse standards.
- Created the `degirtools` R package (9 exported functions, roxygen2 docs, devtools::check() passing) by extracting reusable logic from a 767-line helper file.
- Built an interactive R Shiny web application (6 modules: overview, interventions, complications, radiation doses, success rates, about) using plotly, DT, and bslib. Deployed to shinyapps.io with GDPR-safe synthetic data.
- Wrote tidymodels training materials (Quarto/GitHub) for researchers transitioning from caret, demonstrating modern reproducible ML workflows in R.

Continuing Education – Bioinformatics and Biostatistics

CQ Beratung + Bildung GmbH

📅 08/2025 - 02/2026 📍 Berlin, Germany

Applied bioinformatics and biostatistics

- Programming methodology: Shell (BASH), Python (object-oriented), R.
- Bioinformatics databases (NCBI, Biopython, SQL) and sequence analysis.
- NGS analysis pipelines (Next-Generation Sequencing; Nextflow, Galaxy); structural bioinformatics.
- Biostatistics (R/Bioconductor): ANOVA, PCA, HCA, multivariate analysis, Markov chains.
- Capstone: Built a reproducible Nextflow (DSL2) pipeline for Hepatitis Delta Virus sequence analysis — automated NCBI download, MAFFT alignment, and trimAl trimming with Conda-managed dependencies (📄 GitHub).

Guest Scientist
(parallel to continuing education from 08/2025)

KEY STRENGTHS

Research Data Management & FAIR

Built config-driven metadata architectures (257 rules → 8 CSVs), reproducible Nextflow pipelines with Conda dependencies, and automated data retrieval from public APIs (NCBI). Committed to FAIR data principles.

Data Pipeline Engineering

Refactored a production data pipeline (1,834 lines, 143K records, ~300 clinics) with 26.5% code reduction. Built `degirtools` R package. Byte-level verification after every change via `identical()`.

Bioinformatics & Reproducible Research

Proficient in NGS data analysis, building reproducible pipelines with Nextflow (DSL2), Bioconductor workflows, and ensuring GDPR-compliant data handling.

TECHNICAL SKILLS

Programming

R (tidyverse, Shiny, tidymodels, Bioconductor), Python (JAX, Pandas, NumPy), SQL, Fortran, C++, BASH

RDM & Data Infrastructure

Config-driven metadata architectures, pipeline refactoring, `identical()` verification, R Shiny web applications, large datasets (HDF5, NetCDF)

Bioinformatics

NGS analysis, Nextflow (DSL2), sequence analysis, Bioconductor, NCBI databases

Biostatistics

Multivariate analysis, PCA, ANOVA, dimensionality reduction, tidymodels, clinical endpoints

Tools

Git/GitHub, Linux/Unix, HPC clusters, Conda, LaTeX, Docker concepts

COURSES & TRAINING

High Performance Computing (HPC) Training

Jülich Supercomputing Center (JSC),
Forschungszentrum Jülich

MITx: 7.00x Introduction to Biology – The Secret of Life

Comprehensive coursework in genetics, biochemistry, and molecular biology.

Helmholtz-Zentrum Hereon, Ecosystem Modelling

05/2025 - 10/2025

Geesthacht, Germany

Applied advanced computational methods to simulate long-term environmental impacts in marine ecosystems. Finalised the high-performance computational modelling framework and prepared simulation data for peer-reviewed publication.

Job Search & German Language Course

02/2025 - 04/2025

Hamburg, Germany

Active job search and German language acquisition (Goethe-Zertifikat B1).

Post-doctoral Scientist

Universität Hamburg, Institute for Marine Ecosystem and Fishery Science

08/2021 - 01/2025

Hamburg, Germany

Computational science and marine ecosystem modelling

- Parental leave from 01/2024 to 12/2024.
- High-performance computing (HPC): Led the translation of a legacy Fortran model into a high-performance Python simulation engine. Utilized Google JAX vectorization and branchless logic for massive parallelization on TPUs and GPUs.
- Model development: Developed the "Cyanobacteria Life Cycle" model within ERGOM framework; processed large NetCDF datasets in Linux HPC.

Career Transition

04/2021 - 07/2021

Hamburg, Germany

Relocation from India to Germany and active job search.

Physics Tutor & Chess Coach — Freelance / Tutorwaves Solutions Inc., Kerala, India · 10/2018 – 03/2021

Doctoral Researcher in Astrochemistry

Université Paris-Saclay

10/2015 - 09/2018

Orsay, France

Conducting atomic collision experiments, data analysis, and results modelling.

- Acquisition and processing of terabytes of raw data from tandem particle accelerator experiments.
- C++ code optimisation: improvement of existing algorithms for noise suppression, signal smoothing, and conversion of raw data into multi-dimensional structures.
- Development of a molecular fragmentation model for predicting chemical reactions in space (contribution to the KIDA database).

EDUCATION

Ph.D. in Astrochemistry

Université Paris-Saclay, Institute of Molecular Sciences (ISMO)

10/2015 - 09/2018

Orsay, France

Supervisor: Dr. Karine Béroff. Thesis: *Excitation and fragmentation of C_nN^+ ($n=1-3$) in collisions with He atoms at intermediate velocity.*

M.Sc. in Physics

National Institute of Technology Calicut, India

07/2012 - 12/2014

Calicut, India

First Class with Distinction (CGPA 8.71/10).

Research Project – Theoretical Atomic Physics

IIT Mandi (under Dr. Hari Varma)

02/2015 - 08/2015

Mandi, India

Theoretical atomic physics; partly remote.

B.Sc. in Physics

University of Calicut, India

06/2009 - 04/2012

Thrissur, India

Grade: B+ (CGPA 3.49/4.0).
