CAREER INTERESTS

Computational Scientist (PhD) with 5+ years of experience in **large-scale data analysis, statistical modeling, and pipeline development**. Trained in **R (Bioconductor, Tidymodels)** and **Python (Pandas, NumPy, Scikit-learn)** for high-dimensional data analysis. Built a viral genomics pipeline using **Nextflow (DSL2)**. Currently deepening skills in data pipeline development, **genomics**, AI/machine learning, and NGS analysis through specialized training and an industry internship. Eager to develop expertise in **single-cell multi-omics** and apply computational and data science skills to advance research in **stem cell biology and genomics**.

EXPERIENCE

Internship – Bioinformatics & Data Pipeline Engineering

HealthTwist GmbH

02/2026 - 04/2026

Berlin, Germany

Clinical data research and development under Dr. Andreas Busjahn

- Refactored a 1,834-line medical data pipeline (R/tidyverse) for Germany's interventional radiology quality registry (DeGIR); 143K rows × 1,920 columns.
- Externalized 257 hardcoded rules into 8 config files; 26.5% code reduction with byte-level output verification (`identical()`).
- Identified 2 latent bugs through systematic code analysis; documented without altering pipeline behavior.
- Machine Learning workflows using the Tidymodels framework in R.

Further Training – Bioinformatics and Biostatistics

CQ Beratung + Bildung GmbH

08/2025 - 02/2026

Berlin, Germany

Application-related Bioinformatics and Biostatistics

- Programming methodology: Shell (BASH), Python (object-oriented), R.
- Bioinformatics databases (NCBI, Biopython, SQL) and sequence analysis.
- NGS analysis pipelines (Nextflow, Galaxy); structural bioinformatics.
- Clinical biostatistics (R/Bioconductor, ANOVA, PCA, HCA, survival analysis); GDPR/BDSG compliance.

Guest Scientist

Helmholtz-Zentrum Hereon, Ökosystemmodellierung

05/2025 - 10/2025

Geesthacht, Germany

Computational Biologist & Systems Modeler

- Spearheaded research modeling evolutionary processes in marine ecosystems.
- Applied advanced computational techniques to simulate long-term environmental impacts.

Post-doctoral Scientist

University of Hamburg, Institute of Marine Ecosystem and Fisheries Sciences

08/2021 - 01/2025

Hamburg, Germany

Marine Ecosystem Modelling

- Developed the novel "Cyanobacteria Life Cycle" (CLC) model within the ERGOM framework for climate warming projections.
- Engineered models in Fortran and analyzed large NetCDF datasets using Python in Linux.
- Statistical analysis and visualization of ecological time-series data using R.

STRENGTHS

Data Pipeline Engineering

Refactored a production medical data pipeline (1,834 lines, 143K rows), achieving 26.5% code reduction with zero behavioral regression. Byte-level verification after every change.

Complex Problem-Solving

Resolved a critical data-loss error by creating a Fortran simulation to correct for a misplaced particle detector, recalculating results using multi-sensor data.

Bioinformatics & Biostatistics

Bridged physical science expertise with modern biological workflows. Skilled in NGS data analysis, sequence alignment, and multivariate statistical modeling using R (Bioconductor) and Python.

TECHNICAL SKILLS

Programming

Python (Pandas, NumPy, Scikit-learn, Biopython), R (Bioconductor, Tidymodels, ggplot2), SQL, BASH

Bioinformatics

Nextflow (DSL2), NGS Analysis, Multiple Sequence Alignment (MAFFT), Sequence Trimming (trimAl), NCBI / Entrez

Biostatistics & ML

Multivariate Analysis, PCA, ANOVA, Dimensionality Reduction, Clustering, Scikit-learn, Tidymodels

Data Engineering

Large dataset processing (HDF5, NetCDF), Pipeline development, Data visualization

Tools

Linux/Unix, Git, HPC clusters, Conda

TRAINING / COURSES

IBM: Machine Learning with Python; Introduction to AI

Coursera (in progress)

High Performance Computing (HPC) Training

Jülich Supercomputing Center (JSC), Forschungszentrum Jülich

MITx: 7.00x Introduction to Biology - The Secret of Life

Comprehensive coursework on genetics, biochemistry, and molecular biology.

Physics Educator
Tutorwaves Solutions Inc / Freelance
10/2018 - 03/2021 Kerala, India

Prepared physics content for competitive examinations and coached state-level chess teams.

Ph.D. Researcher in Astrochemistry
University of Paris-Saclay
10/2015 - 09/2018 Orsay, France

- Led atomic collision experiments, analyzed data, and modeled outcomes.
- Acquired and processed terabytes of raw data from tandem particle accelerator experiments.
 - C++ signal processing, algorithm development, and molecular fragmentation modeling (KIDA database).

EDUCATION

Ph.D. in Astrochemistry
Université Paris-Saclay, Institute of Molecular Sciences (ISMO) Orsay, France
09/2015 - 09/2018 Orsay, France

M.Sc. in Physics
National Institute of Technology Calicut, India
07/2012 - 01/2015 Calicut, India

B.Sc. in Physics
University of Calicut, India
06/2009 - 04/2012 Thrissur, India

OTHER SELECTED PROJECTS

- Hepatitis Delta Virus Pipeline** • GitHub
Nextflow (DSL2) pipeline for viral sequence analysis: NCBI Entrez download, MAFFT alignment, trimAl trimming, Conda-managed dependencies.
- Introduction to Tidymodels** • GitHub
Teaching script for ML in R: recipes, parsnip, workflows, and yardstick on the Palmer Penguins dataset.
- Berlin Tree Analysis** • GitHub
Interactive Jupyter notebook analyzing 5 years of tree planting data in Berlin using Python, Pandas, and Seaborn.
